

HIMASH MAYADUNNA

Software Engineering Undergraduate | Full Stack Developer Intern

Biyagama, Sri Lanka 075-411-9616 | himashheshan193@gmail.com | [Himash.dev](https://himash.dev) | [LinkedIn](#) | [GitHub](#)

ABOUT ME

Software Engineering undergraduate with experience building scalable web and mobile applications using React.js, Next.js, ASP.NET Core, Node.js, Flutter, and SQL databases. Skilled in developing RESTful APIs, designing relational databases, and delivering full-stack solutions. Seeking a Software Engineering Internship to contribute to real-world software development while continuing to grow as an engineer.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, TypeScript, Dart

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication

Databases: Microsoft SQL Server, PostgreSQL, MongoDB, Firebase, Supabase

Mobile Development: Flutter

Developer Tools: Git, GitHub, VS Code, Postman, Figma, Vercel

TECHNICAL PROJECTS

Healthcare & Inventory Management System | [GitHub Repository](#) |

A full-stack healthcare and inventory management platform designed to streamline patient records, appointments, prescriptions, and medical inventory operations.

- Engineered a full-stack healthcare management system using **React.js, TypeScript, Node.js, and Express.js**.
- Architected a **3NF Microsoft SQL Server** database with **20+ relational tables**, stored procedures, triggers, views, and functions.
- Developed **30+ secure RESTful API endpoints** with JWT authentication for patient, inventory, billing, and appointment management.
- Built responsive dashboards and reporting features using **React Query, Axios, and Tailwind CSS**.

Technologies: React.js, TypeScript, Node.js, Express.js, Microsoft SQL Server, JWT, REST APIs, React Query, Axios, Tailwind CSS, Git, GitHub

BoardLanka | [GitHub Repository](#) | Live Demo: [BoardLanka](#) |

A full-stack property rental marketplace connecting property owners and renters across Sri Lanka, with role-based dashboards and secure booking management.

- Built a full-stack property rental marketplace using Next.js, Node.js, Express.js, Supabase (PostgreSQL), and Tailwind CSS.
- Built secure RESTful APIs with complete CRUD operations for property management, booking requests, user profiles, and administrative functions.
- Implemented image upload and storage for property listings using Supabase Storage, and automated email notifications via the Resend API.

Technologies: Next.js, Node.js, Express.js, Supabase (PostgreSQL), Supabase Auth, Supabase Storage, Resend API, Tailwind CSS, Git, GitHub

TravelMate (Group Work) | [GitHub Repository](#) |

A cross-platform mobile travel planning application that helps users discover destinations and plan trips based on personal preferences.

- Developed a cross-platform mobile application for iOS and Android using Flutter and Dart.
- Crafted a responsive, modern user interface focused on intuitive travel planning and destination discovery.
- Integrated Firebase Authentication and Cloud Firestore for secure user registration, login, and real-time cloud-based data management.

- Established an AI-powered travel recommendation engine that generates personalized destination suggestions based on user budget, travel duration, and interests, incorporating Map API integration for location-based results.

Technologies: Flutter, Dart, Firebase Authentication, Cloud Firestore, Map API

AuctionHub | [GitHub Repository](#) |

A full-stack online auction platform that enables users to create auctions, place bids in real time, and manage listings through a secure web application.

- Architected a full-stack auction platform using ASP.NET Core, C#, and Entity Framework Core.
- Implemented secure user authentication and authorization for buyers and sellers.
- Built auction listing, bidding, and auction management modules with complete CRUD functionality.
- Developed a responsive user interface and integrated a relational database for efficient data management.
- Applied MVC architecture and RESTful principles to create a scalable and maintainable application.

Technologies: ASP.NET Core, C#, Entity Framework Core, SQL Server, Next.js, Tailwind CSS, Git, GitHub

Work Experience

SAP System Support,

Marangoni Tyre Lanka (Pvt) Ltd Jan 2022 – May 2022

- Maintained and updated **SAP Material Master Data** to ensure accurate inventory and production records.
- Collaborated with cross-functional production teams to improve the accuracy and consistency of SAP Material Master Data, supporting efficient inventory and manufacturing operations.
- Ensured data accuracy and consistency for materials used in manufacturing operations.

EDUCATION

BSc (Hons) in Software Engineering — NSBM Green University

2023 – Expected 2027

Diploma in English — ESOF Metro Campus

G.C.E. Advanced Level — Bandaranayake College, Gampaha

RELEVANT COURSEWORK

Software Engineering, Object-Oriented Programming, Data Structures & Algorithms, Database Management Systems, Advanced Database Systems, Web Application Development, Mobile Application Development, Software Quality Assurance, Human Computer Interaction, Operating Systems, Computer Networks

SOFT SKILLS

Problem Solving • Communication • Team Collaboration • Adaptability • Time Management • Critical Thinking • Continuous Learning
